

4G LTE CONTAINER TRACKER

MTL-1502

MTL1502 is an advanced container tracking model with up to **10 - year standby time!** The **GPS** Tracker supports **LTE CAT M1/NB2** that features lower power consumption. With a **57.000 mAh** ultra-high capacity replaceable battery, it has a 10-year standby time, making it much easier for operation and maintenance. Its **fit-and-forget** installation offers unattended management and uninterrupted protection for your assets.

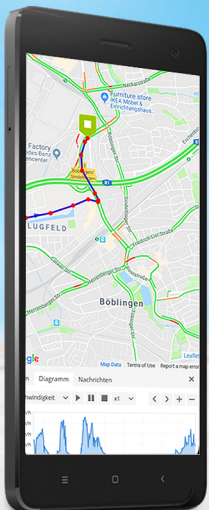

MTL1502 has a unique casing design ideal for containers and trailers application, saving you higher installation costs. Thanks to the **IP68** compliant feature, the highest **waterproof** level, it works perfectly in harsh environment.

miTrack | GPS PORTAL

miTrack GPS Portal is an user-friendly and cloud-based software that is constantly being further developed. All data are clearly displayed and can be used for further processing. For example, automatic reports or alarm notifications via email are possible. An API is also provided so that the data can be transferred to another, existing system easily.

Application examples:

- Container Tracking**
- Trailer Tracking**
- Asset Monitoring**
