

TRAILER TRACKER^{LTE}

MTL-1600

MTL-1600 is an **LTE** product specifically designed for heavy duty vehicles applications including trailer, tanker, reefer and flatbed trucks. Its ruggedized **waterproof design** ensures the product is reliable when installed in harsh environments commonly found in heavy transportation such as fuel and chemical transportation.

MTL-1600 can work up to **3 months** without external power, making it ideal for tracking trailers even when disconnected.

miTrack | GPS PORTAL

miTrack GPS Portal is an user-friendly and cloud-based software that is constantly being further developed. All data are clearly displayed and can be used for further processing. For example, automatic reports or alarm notifications via email are possible. An API is also provided so that the data can be transferred to another, existing system easily.

Application examples:

- Trailer Tracking
- Tanker Tracking
- Flatbed Truck Tracking
